

ENCLOSURE: JUNCTION BOX WITH TERMINALS

(Glass Reinforced Polyester) EJPB series

Increased Safety and Dust protection by enclosure

APPLICATION

The **EJPB** series junction boxes are engineered from high-grade **Glass Reinforced Polyester (GRP)**, offering a superior alternative to metal enclosures in highly corrosive environments. These non-metallic enclosures are **inherently corrosion-proof** and UV resistant, making them ideal for offshore platforms, chemical plants, and coastal areas.

Designed for instrument, control, and distribution applications, the **EJPB** provides **Ex e (Increased Safety)** and **Ex i (Intrinsic Safety)** protection. Its lightweight construction significantly reduces installation time and labor costs, while the anti-static properties ensure maximum safety in **Zone 1, 2 (Gas)** and **Zone 21, 22 (Dust)**.

SPECIFICATION

Housing materia	: Glass Reinforced Polyester (GRP) / Anti-static material
Sealing gasket	: Silicone rubber / Neoprene (CR)
Lid screws, Hinge	: Stainless steel SUS 316L (Non-corrosive)
